## **Comsec Access Control Package – Simplifying Security for Businesses**

### **Introduction**

Comsec has been providing reliable security solutions since opening its doors in June 2007. Based in Camrose, Alberta, we pride ourselves on offering expertise and exceptional service. With over 55 years of combined experience among our technicians, we are well-equipped to address any security challenge. As the demand for security continues to grow, we are actively training additional technicians to expand our team.

As a proud distributor of GeoVision surveillance equipment, renowned for award-winning quality and used in city surveillance across Europe, Comsec ensures top-tier solutions. Additionally, we integrate DSC hardware for robust and reliable alarm systems.

Our portfolio includes securing Domino's Pizza locations in Edmonton, Camrose, Leduc, Sherwood Park, and Fort Saskatchewan, as well as a variety of liquor stores, fast food establishments, car dealerships, and more.

Recognizing the challenges faced by businesses with high employee turnover, we have developed a special package to address the costly and time-consuming process of rekeying doors after staff changes.

### **Access Control Package**
